## About Me

The bulk of my experience is in an office setting, where I developed a wide range of administrative and technical skills. These roles emphasized adaptability, initiative, and a keen mind. I've also worked in many roles where keeping a fast pace and following instructions carefully were more important. I hold a Bachelor of Philosophy, Politics and Economics, which has rewarded me with a curious and analytical mind. I'm set to complete my Bachelor of Software Engineering before the end of the year, and am already well placed to leverage my information technology aptitude. However, the most important things to know about me are that I'm a sensible, polite person with a keen mind and an amiable personality. I value honesty, humility, and simplicity and am confident I will be able to adapt to and thrive in any role.

## Work History

### Primary Connect — Order Selector

Wodonga, Victoria, 2023 to 2024

- Used an order-selection forklift and voice picking system to build pallets for Woolworths supermarkets.
- Worked to a productivity target with a respectable average speed and high accuracy.

### Parliament of Victoria — Parliamentary Advisor

Wodonga, Victoria, 2019 to 2023

- Conducted legislative analysis and policy research to support parliamentary decision-making
- Prepared 10+ briefs on bills before the parliament and wrote 16+ speeches including research and fact-checking, per month.
- Created a bespoke office expense accounting spreadsheet to manage the parliamentary budgeting process.
- Supported media strategy, messaging, and digital communications.
- Reworked the intra-office filing system and naming conventions. Oversaw office administration, record-keeping, and workflow prioritisation.
- Operated in a high-accountability environment requiring discretion and sound judgement.
- Interviewed candidates and trained new staff.

## Parliament of Australia — Electorate Officer

Drummoyne, New South Wales, 2018 to 2019

- Provided constituent support and correspondence management.
- Assisted with digital marketing, messaging, and public communications.
- Supported policy research and administrative operations in a junior capacity.
- Identified 10,000+ defunct records in the CRM database, saving thousands in wasted mass communication expenses.
- Identified a key factor in member attrition (50%+ drop off rate) and developed solutions that would dramatically increase retention.

## Grattan Institute — Research Intern

Carlton, Victoria, 2017

- Conducted data analysis and visualisation for research on minor party voting trends.
- Used R and Carto to analyse datasets and produce maps and charts that were included in the 2018 report “A crisis of trust: The rise of protest politics in Australia”.
- Developed practical research and analytical skills in a professional policy environment.

Process Worker - Norfolk Foods: Summer work, 2016-17

Retail Assistant - Co-Op Bookstore: Temporary work, 2016

Process Worker - Rich River Meats: Summer work, 2015-16

Farm Hand - Alabar Bloodstock: Summer work, 2013-14

---

## Education

La Trobe University — Bachelor of Information Technology (Software Engineering)

Expected Completion - Nov 2026

University of Victoria — Certificate IV Cyber Security

Attained - 2024

La Trobe University — Bachelor of Politics, Philosophy, and Economics

Attained - 2017

*I suspect this degree may be undervalued by some employers. What good is philosophy in practice? Philosophy, as an academic subject, is best understood as the study of how to think well. Philosophy graduates have analytical skills that help them improve at everything they do. They tend to be good at identifying problems, developing solutions, and weighing options across domains.*

*Additionally, students of philosophy tend to perform better on standardized tests. They consistently score among the top 5 majors on the SAT and LSAT. Economics majors do well on these tests too.*
